You will now need to choose the path to which you wish to extract the album. This will be the parent folder, the album will automatically be saved using Artist and Album title, like this:

Path \ Artist \ Album

Click on “Select Folder” to initiate the extract.

You can also choose this folder before extracting by clicking the “Choose Path” button.

The progress bar will run left to right as the tracks are extracted to your hard drive, and when clear will indicate the extract has completed.
